

MHS Healthcare Solutions: Improving patient outcomes through automation of diagnostic intelligence

Combining the best science with cutting-edge technology, we are dedicated to removing barriers to access and utilization of our behavioral health tools.

You understand the critical role of **data-driven decision-making** in delivering **optimal patient care**. That's why we're excited to introduce you to MHS assessments, trusted for their **robust scientific grounding** and **unparalleled efficacy**.

Leveraging your existing digital health infrastructure, we can seamlessly integrate our research-validated assessment tools into your environment, allowing you to automate **diagnostic intelligence** and **elevate the standard of care** within your organization at an unparalleled pace. Welcome to the future of behavioral healthcare assessment solutions.

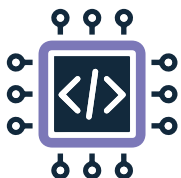

Our Solutions Integrate within your Business Platforms

The MHS Universal REST API allows us to integrate our entire assessment lifecycle into a third-party platform, from administration to scoring to reporting. By combining the **robust data infrastructure** of these business platforms with the **diagnostic precision of validated assessments**, healthcare organizations can elevate their approach to patient services, leading to **improved outcomes** and **enhanced quality of care**.

KEEP YOUR DATA SECURE

Store your patients' behavioral health assessment data in your platform. Maintain confidentiality and protect sensitive information, ensuring compliance with privacy regulations.

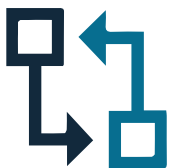

EMBED DIAGNOSTIC INTELLIGENCE

Inform clinical decision making and enrich your reporting and data analysis with individual and aggregate level insights drawn from standardized, norm referenced diagnostic behavioral health measures.

IMPROVE PATIENT OUTCOMES

Leverage embedded diagnostic intelligence from MHS assessments to enhance patient care decisions. Address challenges sooner and with greater accuracy for more patients promoting retention and improving their experience.

ENHANCE CLINICAL WORKFLOWS

Boost operations by updating to frictionless workflows. Use standardized assessment observation and outcome items to trigger customized, strategic automations that shorten intake processes and drive the assessment lifecycle forward.

INCREASE CARE TEAM SATISFACTION

Streamline decision making and reduce manual effort to optimize engagement with clinical staff. Conveniently access assessment data to tailor and adjust treatment in the moment. Design your solution with flexibility to adapt alongside practice advancements.

EFFECTIVELY ALIGN RESOURCES

Immediate assessment results guide resource allocation prompting timely intervention and informed referrals.

SUPPORT ORGANIZATIONAL GROWTH

Plan for scalability and sustainable access ensuring provision of more services to more patients over time. Remain relevant with updates to assessment measures and technology based on the most recent research findings in behavioral health.

MHS INSIGHTS APP

Our MHS Insights App empowers our customers using Salesforce, EPIC, or Microsoft Dynamics to implement fluid assessment workflows. By delivering consistent functionality within the native environment of each platform and exposing event triggers, partners can develop custom automations to enhance their operations and improve both patient and care team experience.

API INTEGRATIONS

Our MHS API Integrations are ideal for customers with purpose built platforms and organizations with developer resources in house or easily available. We deliver documentation and recommendations to support the entire assessment lifecycle.

CONSULTATION SERVICES

We understand that each healthcare organization has unique needs and challenges, which is why we offer a range of services to complement our solutions. Work closely with our consultants to:

- **Discover and co-create custom solutions** that address specific needs and requirements, ensuring a tailored approach that maximizes the value of our offerings.
- **Develop a customized integration or implementation plan** that aligns with your organization's unique goals and challenges.
