The Digital LS/CMI Assessment and Case Management Platform

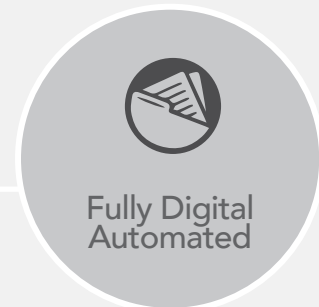

AGE

ADMINISTRATION TIME

ADMINISTRATION TYPE

The Level of Service/Case Management Inventory (LS/CMI) is a fully digital case management tool and assessment platform that measures the risk and need factors of offenders. This evidence-based system is loaded with features to help users efficiently assess a client's level of risk.

Benefits of the LS/CMI Assessment and Case Management System

- **Fully digital administration, automatic scoring and reports generated with the click of a button**
- The real time **Risk Calculator increases assessment transparency** and the evaluator's understanding of how each item effects the client's risk level
- **Reports include data visualizations** to help users and offenders easily understand assessment results
- Ability to **manage user access and seamlessly transfer clients** from one user to another and from one institution to another
- The **Scheduling Assessment feature allows users to set up reminders** for when follow up assessments should be planned
- When completing a new LS/CMI assessment, the **Auto Populate feature allows users to automatically fill in answers from a previous assessment** if still applicable
- Off the shelf **customizable goals, interventions, reports, and case management module** with ability to track clients through treatment

Key Areas Measured

Features

LS/CMI Assessment Section

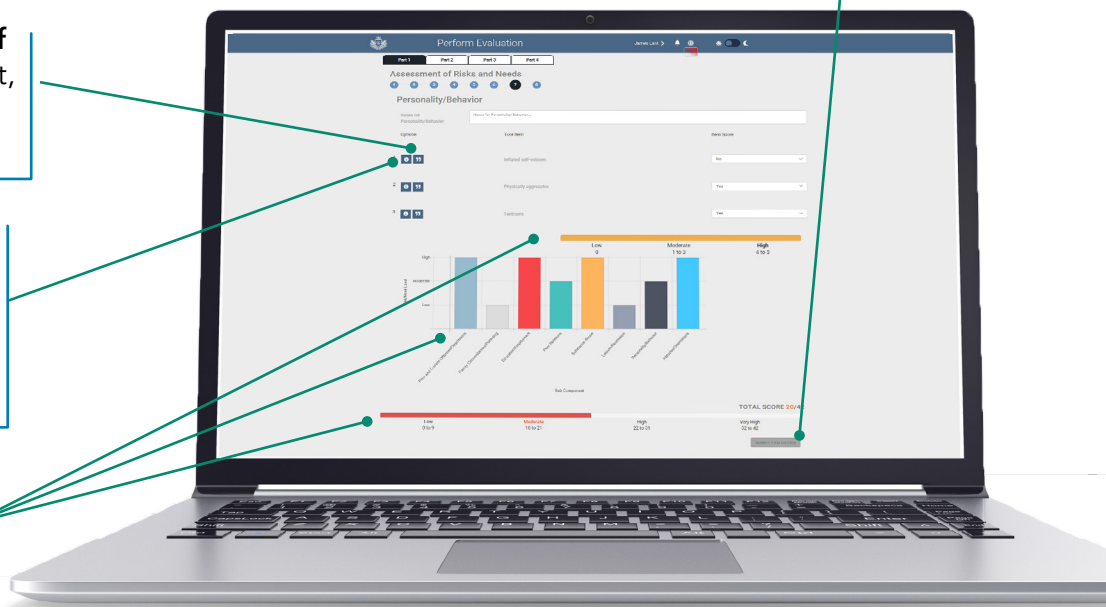

The **Save and Resume** feature allows you to fill in the information you have for the assessment and at a later time add additional data as it becomes available.

Generate customized, **automated reports** with the click of a button.

Users can select the **Sources of Information** for the assessment, increasing the validity of user responses.

The **Reference Text** feature makes it easier to answer each item, simply click the button beside the item to view the scoring guidelines for each question.

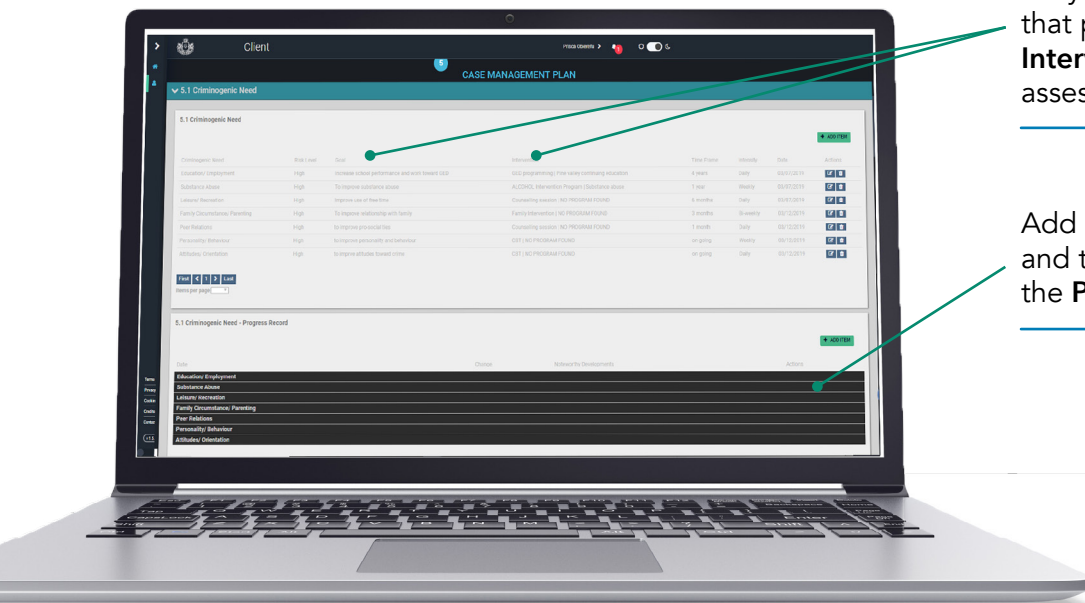

Our fully transparent **Sub Component Risk Calculator, Risk/Needs Chart, and Risk Calculator** provides users with the client's risk/needs level in real time.

LS/CMI Case Management Section

Fully automated case plan system that pre populates custom **Interventions** and **Goals** based on assessment results.

Add Items specific to the individual and track the client's treatment in the **Progress Records** section.

Quickly Prioritize High-Risk Adult Offenders with the LSI-R:SV™

The Level of Service Inventory-Revised: Screening Version™ (LSI-R:SV) is now available digitally and is designed to efficiently prioritize high risk offenders for purposes of triaging. Results from the LSI-R:SV can be used to indicate individuals who should be assessed with a complete risk and needs measure such as the LS/CMI.
