The YLS/CMI 2.0 Assessment and Case Management Platform

AGE

ADMINISTRATION TIME

ADMINISTRATION TYPE

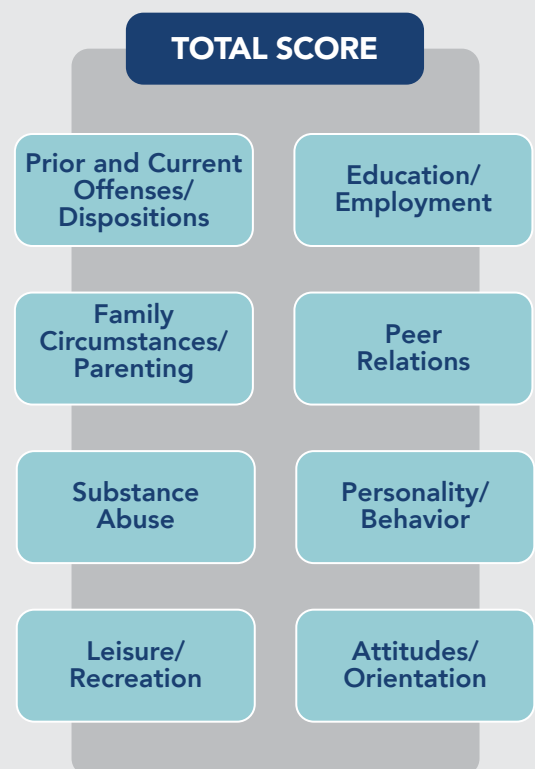

The Youth Level of Service/Case Management Inventory 2.0 (YLS/CMI 2.0) is a gender-informed, culturally-informed, strengths-focused risk/needs tool that reliably and accurately classifies and predicts re-offending within juvenile populations. To meet the unique needs of your organization, this platform is highly configurable allowing you to tailor the system to your agency.

Benefits of the YLS/CMI 2.0 Assessment and Case Management Platform

- Highly configurable dashboards to help users better understand their organization
- Off the shelf customizable goals, interventions, reports, and case management module with ability to track clients through treatment
- Better manage caseloads and caseplans with full visibility into a users workload
- Ability to manage user access and seamlessly transfer clients from one user to another and from one institution to another
- Access available through all web browsers or fully integrated into any case management system
- Real time risk calculator increases assessment transparency and the evaluator's understanding of the assessment results
- Accessible from a computer, Android, or iOS tablet

Key Areas Measured

Features

YLS/CMI 2.0 Assessment Section

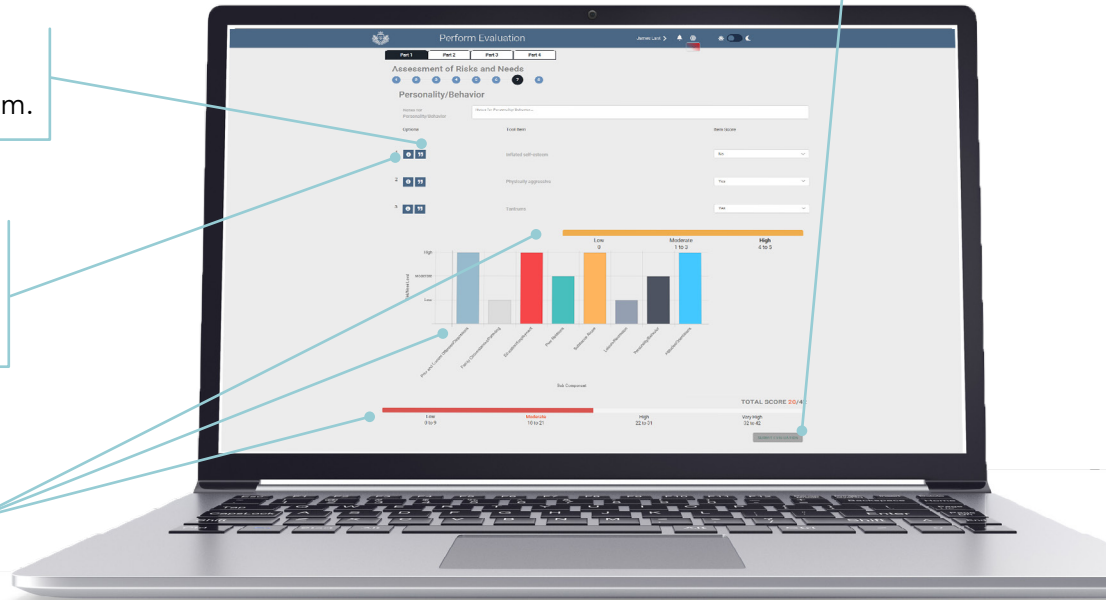

The **Save and Resume** feature allows you to fill in the information you have for the assessment and at a later time add additional data as it becomes available.

Generate **automated reports** with the click of a button.

Users can select where the **Source of Information** came from for the answer to each item.

The **Item Reference** feature allows you to view the scoring guidelines for each question on the YLS/CMI 2.0.

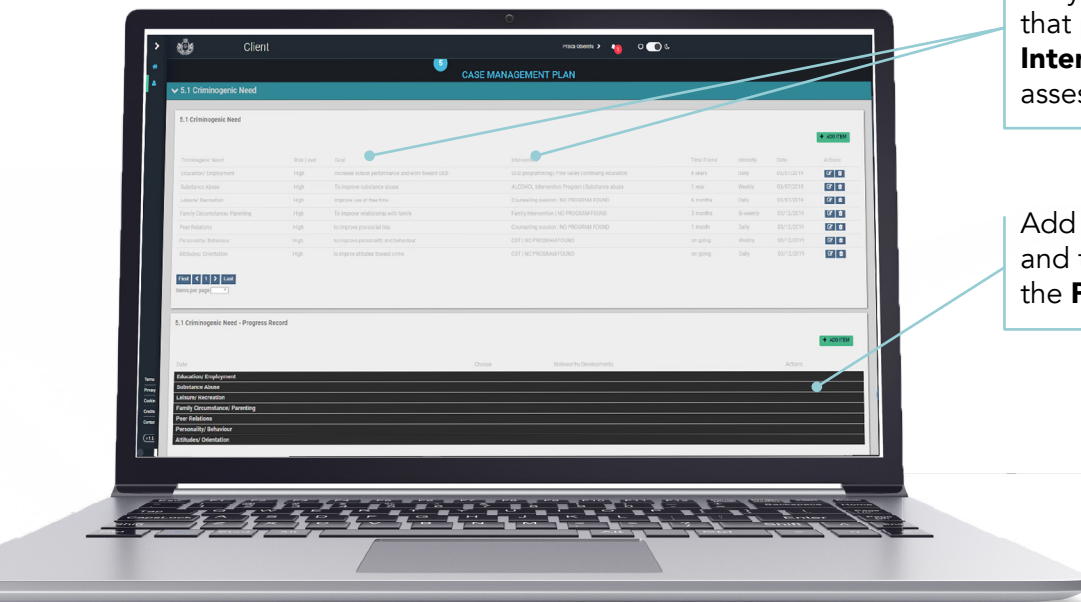

Our fully transparent **Sub Component Risk Calculator, Risk/Needs Chart, and Risk Calculator** provides users with the youth's risk/needs level in real time.

YLS/CMI 2.0 Case Management Section

Fully automated case plan system that pre populates custom **Interventions** and **Goals** based on assessment results.

Add Items specific to the individual and track the youth's treatment in the **Progress Records** section.

Quickly Screen Recidivism Risk Among Juvenile Populations with the YLS/CMI:SRV

The **Youth Level of Service/Case Management Inventory:**

Screening Research Version (YLS/CMI:SRV) is designed to provide an initial screening of risk and need levels in 12–18 year olds for purposes of determining the level and nature of interventions required by the youth. The YLS/CMI:SRV is successfully used in conjunction with the YLS/CMI 2.0 by many statewide organizations to assess youth for their risk to reoffend.

YLS/CMI 2.0 Training

This on-demand workshop is delivered by Master Trainer, Ralph Fretz and will train you in the use of the YLS/CMI 2.0. Item-by-item instructions will be given on how to reliably score the measure and interpret its findings, a review of peer-reviewed research on the YLS/CMI 2.0 will be provided, and guidance will be put forth on how to apply YLS/CMI 2.0 reporting conventions.
